EDUCATION

Oakton Community College

Associates in Computer Science A.S

Graduated: Dec 2024

Northeastern Illinois University

Bachelor's in Computer Science, with a focus in Information Technology

Expected Graduation: December 2026

- GPA: 3.8/4.0

SKILLS

- Programming Languages:** Python, C++, C, Swift, JavaScript, Java
- Frameworks/Technologies:** ReactJS, jQuery, HTML, ASP.NET
- Software and Tools:** Adobe Photoshop, Windows OS, ArcGIS, Microsoft 365, Azure, WinGet, PowerShell
- Computer Hardware and Software:** Experienced in building computers, troubleshooting hardware components, and optimizing system performance. Proficient in operating systems, drivers, and firmware configurations.
- Spoken Languages:** (Primary) English, and Urdu (Secondary)

EXPERIENCE

Fiverr, Support, and IT services

December 2021-May 2025

- Delivered remote IT support via Fiverr, resolving system, software, and performance issues for clients.
- Configured and maintained IT systems, including software installations, network setup, and security updates.

Three Crowns Park/Lead Dining Server

September 2022 - Current

- Utilized point of sale (POS) systems to efficiently process transactions, manage orders, and troubleshoot technical issues.
- Developed proficiency in data entry, inventory management systems, and scheduling software

PROJECTS

Headstarter Software Engineering Fellowship

July 2025

- Worked on team based software projects applying core CS concepts, clean code, debugging, and version control.

Store / Order Management App

October 2025

- Built a Java application using custom ListADT and QueueADT to manage customer orders and process shipments.
- Used generics, interfaces, linked nodes, recursion, and exception handling for safe data operations.

Responsive Web Application for Sports Content

November 2025

- Designed and built a responsive Chicago Bears themed website using HTML, CSS, and JavaScript.
- Created structured navigation, custom styling, and basic JavaScript functionality to deliver an engaging sports-focused user experience.

Data Analysis & Visualization Python Project

December 2025

- Analyzed a real-world dataset by cleaning data, performing exploratory analysis, and generating visualizations to identify trends and insights.

System Health Check Bot

January 2026

- Built a Python-based system health check automation that verifies disk space, system status, and OS information and generates a concise report to reduce manual troubleshooting.

CERTIFICATIONS

Google IT Support Professional/Google Career Certificates

- Developed practical skills in IT support, including system troubleshooting, networking fundamentals, command-line tools, and basic cybersecurity concepts.

Google Data Analytics/Google Career Certificates

- Gained hands-on experience with data cleaning, analysis, and visualization using spreadsheets and SQL.
