EDUCATION

Oakton Community College

Associates in Computer Science A.S

Graduated: Dec 2024

Northeastern Illinois University

Bachelor's in Computer Science, with a focus in Information Technology

Expected Graduation: December 2026

- GPA: 3.8/4.0

SKILLS

- **Programming Languages:** Python, C++, C, Swift, JavaScript, Java
- **Frameworks/Technologies:** ReactJS, jQuery, HTML, ASP.NET
- **Software and Tools:** Adobe Photoshop, Windows OS, ArcGIS, Microsoft 365, Azure, WinGet, PowerShell
- **Computer Hardware and Software:** PC building, hardware troubleshooting, OS configuration, drivers & firmware

EXPERIENCE

Fiverr, Support, and IT services

December 2022-May 2025

- Delivered remote IT support via Fiverr, resolving system, software, and performance issues for clients.
- Configured and maintained IT systems, including software installations, network setup, and security updates.

Three Crowns Park/Lead Dining Server

September 2022 - Current

- Utilized point of sale (POS) systems to efficiently process transactions, manage orders, and troubleshoot technical issues.
- Developed proficiency in data entry, inventory management systems, and scheduling software.

Headstarter Software Engineering Fellowship

July 2025

- Collaborated on team based software projects using Git, GitHub, debugging, and code reviews

PROJECTS

Store / Order Management App

September 2025

- Built a Java application using custom ListADT and QueueADT to manage customer orders and process shipments.

Network Monitoring Tool

October 2025

- Developed a network monitoring tool to track uptime and latency across multiple hosts and log connectivity issues.

Responsive Web Applications

November 2025

- Built and maintained several web projects using HTML, CSS, and JavaScript, implementing responsive design principles and basic interactive functionality.

Data Analysis & Visualization Python Project

December 2025

- Processed and analyzed real world datasets using Python, applying data cleaning techniques, exploratory analysis, and visualization to extract insights.

System Health Check Bot

January 2026

- Built a Python based system health check automation that verifies disk space, system status, and OS information, and generates a concise report to reduce manual troubleshooting.

IT Ticketing and Help Desk Automation System

May 2025

- Built a lightweight IT ticketing system to log, categorize, and prioritize support requests, simulating help desk workflows.

CERTIFICATIONS

Google IT Support Professional/Google Career Certificates

- Developed practical skills in IT support, including system troubleshooting, networking fundamentals, command-line tools, and basic cybersecurity concepts.

Google Data Analytics/Google Career Certificates

- Gained hands on experience with data cleaning, analysis, and visualization using spreadsheets and SQL.

Microsoft Azure Fundamentals (AZ-900)

- Demonstrated foundational knowledge of cloud concepts, core Azure services, security, compliance, and pricing models.
